EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Wei Te Chung on 03/19/2004.

2. The application has been amended as follows:

Cancel claims 8-12.

13. (Amended) An IC socket assembly comprising:

a stationary base;

a lid mounted upon the base and slidable relative to said base in a vertical direction; and

a plurality of resistant mechanisms disposed in a periphery region of the base, respectively, each of said resistant mechanisms including a spring device; wherein

each of said resistant mechanism defines a moveable upper structure which constantly receives an upwardly urging force due to said spring

device so as to engage the lid and further resist downward movement of

Art Unit: 2833

the lid when said lid is in a tensioned condition, while said moveable upper structure abuts against a fixed portion of either the resistant mechanism or the base when said lid is in a relaxed condition so as to prevent said upwardly urging force from applying to the lid when said lid is in the relaxed condition;

wherein said spring is moveably located in a corresponding hole in the base.

Cancel claim 18.

3. The following is an examiner's statement of reasons for allowance: In regard to claim 1, the prior art fails to provide, teach or suggest a plurality of resistant mechanism assembled in the assembly holes, each resistant mechanism comprising a pole having a first blocking member at one end thereof, a washer, a spring member and a second blocking member, the spring member bearing against the blocking surface of the assembly hole; and in combination with other limitations in the base claim. In regard to claim 13, the prior art fails to provide, teach or suggest the spring is moveably located in a corresponding hole in the base; and in combination with other limitations in the base claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
